

Manufacturing and Azure

A leading manufacturer modernizes its mission-critical business application to elevate customer engagement & expedite time to market.

Business Challenge

- On-premises infrastructure and resources leading to increased operational cost
- Need to develop product features quickly
- Modernize million lines of their legacy code base

Solution

- Rewrite legacy code base in .NET
- Migrated the applications to Azure Cloud Services for agility, and scalability
- Replicated data across multiple regions for enhanced security

Business Value

- Elevates customer engagement
- Faster Time to Market
